

PROJECT DATA

Sustainability Policy Development & Assessment

CLIENT	Hydro Tasmania
PROJECT LOCATION	Tasmania, Australia
DATE OF PROJECT	2004
SERVICES PROVIDED	Sustainability policy development, assessment

In line with its commitment to being a developer and supplier of renewable energy, Hydro Tasmania wants to ensure long-term success by integrating environmental, financial, and social values into its business decisions whilst ensuring accountability, engagement and transparency with its stakeholders. This will enable the organisation to contribute to economic and social development, a healthy environment and quality of life for its employees and the community.

As part of this commitment Hydro Tasmania Consulting was engaged to develop a sustainability policy and framework, as well as undertake a sustainability assessment.

The assessment process was developed around internationally recognised environmental, financial and social indicators of sustainable performance. An assessment of Hydro Tasmania's sustainability performance for 2002 – 2003 and 2003 – 2004 was undertaken, which involved assessing the following aspects of the organisation: Ecosystems and Heritage, Market, Financial, Governance, Operations, Suppliers, Employee Capability and Opportunity, Community, and Health and Safety. The assessment resulted Hydro Tasmania's sustainability performance being included in its Annual Report and various initiatives to implement the Sustainability Policy.
