

Work for an industry leader!

Hydro Tasmania Consulting is a leader in renewable energy, power engineering and environmental and catchment management solutions. Our growing business offers competitive remuneration, flexible working hours and the chance to work on exciting projects nationally and internationally. We have offices based in Hobart, Melbourne, Brisbane and New Delhi.

Specialist Dam Engineer Hobart

The Specialist Professional is responsible for providing a high degree of dam engineering advice and expertise for the effective delivery of Hydro Tasmania Consulting projects. The position will have an emphasis on Dam Engineering/Dam Safety Engineering, although associated hydropower engineering may also be undertaken depending upon resource requirements within the Hydropower and Major Projects Group

The Professional is responsible for contributing to the day to day delivery of engagements for clients as well as undertaking other specific business performance and improvement roles as required. Working within the Civil Team, the incumbent provides informal mentoring to less experienced consultants with emphasis placed in dam safety and project management.

Qualifications

- Tertiary qualifications in Engineering or a related discipline as required for admission as a member of the Institution of Engineers, Australia, or another appropriate professional body.

Experience required in:

- dam engineering, in particular;
- dam investigation and design;
- dam construction;
- dam safety; and
- geotechnical engineering.

Enquiries can be made by contacting Fraser White on (03) 6245 4137
